Summary

Fresher Software Developer with knowledge of Python, HTML, CSS, Bootstrap, and JavaScript. Passionate about web development and building responsive, user-friendly applications. Seeking an opportunity to learn, contribute, and grow in a professional environment.

Education

B.E. in Electronics and Communication Engineering

Kumaraguru College of Technology, Coimbatore, Tamil Nadu

Completed: 2026

CGPA: 6.82 / 10

Higher Secondary Certificate

SVV Higher Secondary School, Gobichettipalayam, Tamil Nadu

Completed: 2022

Percentage: 88.17%

Secondary School Leaving Certificate

SVV Matric School, Gobichettipalayam, Tamil Nadu

Completed: 2020

Percentage: 87.40%

Skills

Front-End: HTML, CSS, Bootstrap, JavaScript

Back-End: Python

Database: MySQL

Tools: VS Code, GitHub

Soft Skills: Problem-Solving, Logical Thinking, Time Management, Adaptability, Teamwork

Experience

Profenaa Technologies, Tiruppur, Tamil Nadu — Intern

January 2026 – Present

Python Full-Stack Development

Tools: Python, Bootstrap, HTML, CSS, JavaScript

- Participating in full-stack development training focused on modern web development technologies and software development practices
- Working with HTML, CSS, Bootstrap, JavaScript, and Python to understand application development workflows and responsive design principles
- Expanding technical expertise in MySQL and Django while gaining practical exposure through hands-on assignments and mini-projects

Projects

Portfolio Website | HTML, CSS, Bootstrap, JavaScript

June 2026

- Developed a fully responsive personal portfolio website to showcase skills, projects, education, and contact information
- Implemented modern UI design, smooth animations, and mobile-friendly layouts for an enhanced user experience.

Montessori School Website | HTML, CSS, Bootstrap

Mar 2026

- Designed and developed a multi-page school website featuring admissions, programs, events, and contact sections
- Created responsive layouts and reusable components to ensure consistency across all devices.

Real-Time FFT-Based Audio Frequency Analyzer Using FPGA | Python, FPGA, Signal Processing

Jan 2026 – Apr 2026

- Developed a real-time audio frequency analyzer using FFT on the PYNQ-Z2 FPGA platform for low-latency signal processing.
- Integrated Python-based control with FPGA acceleration to visualize audio frequency bands in real time

Certifications

- **Introduction to Internet of Things (IoT) – NPTEL, IIT Kharagpur (2024):** Completed a 12-week certified course and achieved Elite certification with a score of 76%.
